- Bangla
- English

About Me:

Passionate and self-motivated Software Engineer with practical experience in designing and developing web and mobile applications. Strong problem-solving skills, adaptability, and a continuous learning mindset. Committed to building efficient, user-focused software solutions and continuously improving technical expertise.

Experience:

Khub Soja (Software company)

August 2024 – Present

Full Stack Developer

- Developed web and mobile applications for business and educational purposes.
- Build applications with rest api, mysql, microservice architecture and dockerization
- Integrated authentication, payment, and notification features.
- Maintained and improved existing applications.
- Worked directly with clients to understand requirements and deliver solutions.

Freelance IT (Software company)

February 2024 – August 2024

Jr. Software Developer

- Delivered software presentations to clients, highlighting custom apps built with Flutter.
- Documented software issues and suggested improvements to senior developers.
- Provided online and offline support to clients, ensuring smooth software usage.
- Contributed to software enhancements, boosting functionality and client satisfaction.

PROJECTS:

Official Web Application (Web) ([www.khubsoja.com](#))

- Developed a full-stack platform with product, software, and course management, order/payment flow, invoice generation, automated certificate generation, and certificate verification/download.
Added advanced features including live chat, interactive fun game, analytics dashboard, image-based content management, and responsive dark/light mode UI.
- Tech Stack: React.js, Tailwind CSS, HTML, Node.js, Express.js, MySQL, Firebase, JWT Authentication, REST API, EmailJS, PDF/QR Generation

Chat Automation Platform (Web) ([www.chatbot.khubsoja.com](#))

- Developed a web application for Facebook/WhatsApp chat automation, AI replies, inbox management, comment moderation, post scheduling, billing, token wallet, and usage reports.
- Tech Stack: React.js, TypeScript, FastAPI, Python, MySQL, Redis, Celery, SQLAlchemy, JWT, OpenAI API, Facebook Graph API, WhatsApp Cloud API, Docker.

Tailoring & Clothing Management System ([www.selaibari.com](#))

- Developed a tailoring and apparel management platform handling custom order measurements, tailor bidding, order tracking, and PDF receipts.
- Tech Stack: Next.js, TypeScript, Node.js, Express.js, MySQL, Tailwind CSS

Hostel Management System (Mobile & Web) ([www.dloyhostel.com.bd](#))

- Implemented a system for hostel administration, covering room allocation, rent collection, and resident details management.
- Tech Stack: Flutter, Node.js, Express.js, MySQL, Firebase (push notification)

Restaurant Management System (Android) ([Google Play Release in Progress](#))

- Developed an app for raw material management, recipe-based item creation, and automatic stock deduction on sales, with multi-role users, reports, employee & accounts management, receipt printing, and SMS notifications.
- Tech Stack: Flutter, Firebase authentication, Firebase Firestore, Firebase Storage, Firebase (push notification)

Card To Contact (Android) ([play.google.com/store/apps/details?id=com.khubsoja.cardtocontact](#))

- Developed an Android application that scans business/visiting cards and uses AI APIs to extract structured contact information for saving directly to the device's contact list.
- Tech Stack: Kotlin, Express.js, MySQL, Firebase, AI API (openai & gemini)
